

Sam Casey

Seattle, WA · sam.casey@example.com · +1 (555) 010-4477 · github.com/samcasey-demo · samcasey.example.com

EDUCATION

University of Washington

B.S. in Computer Science · Sep 2023 – Dec 2027 · GPA 3.8/4.0

Coursework: Machine Learning, Distributed Systems, NLP, Databases

Honors: Dean's List (6 quarters)

EXPERIENCE

Meridian Labs — Machine Learning Engineering Intern

Jun 2025 – Sep 2025 · Seattle, WA · RAG evaluation · retrieval latency · prompt-injection red-teaming

- Built nightly Python/pytest RAG evals over 1,200 tickets, catching 3 retrieval regressions pre-release.
- Cut retrieval p95 from 480 to 210 ms with cache warming and HNSW at stable recall@10.
- Built a 41-case prompt-injection suite required to deploy two production assistants.

UW Systems Research Group — Undergraduate Research Assistant

Oct 2024 – May 2025 · Seattle, WA · GPU cluster scheduling · trace-driven simulation

- Built a GPU scheduling simulator reproducing 3 baselines within 2%, plus a starvation test.
- Cut p99 queueing delay 31% on bursty traces without reducing completed jobs.

PROJECTS

HuggingFace datasets — upstream contributor

Aug 2025 · Python · github.com/huggingface/datasets/pull/DEMO-1

- Fixed CSV row loss and JSONL BOM failures with merged HuggingFace tests.

whisperboard

Jan 2024 – Apr 2024 · Python · PyTorch · github.com/samcasey-demo/whisperboard

- Fine-tuned Whisper-small on 30 h; cut WER from 18.2% to 11.6% on held-out audio.

ledgerlite

Mar 2023 – Present · Rust · SQLite · github.com/samcasey-demo/ledgerlite

- Built an append-only finance CLI with double-entry validation in Rust and SQLite.
- Shipped signed macOS/Linux releases; reached 1.4k stars and 27 contributors.

SKILLS

Languages: Python, Rust

ML: PyTorch, RAG pipelines, eval harnesses

Systems: HNSW, GPU cluster scheduling, Linux, SQLite
